

EXTENDED DEADLINE– The Green Solution Awards

The deadline has been extended to the 25th of March!

Each year, our partner Construction21 is organising the Green Solution Awards. The Awards create an opportunity for professionals and expert in the building sectors to promote their project.

What are the Green Solution Awards?

The Awards are an online campaign taking place over a few months. During the contest, projects are showcased and brought visibility through a worldwide communication plan. In 2019, the Awards registered 4 million views at an international level.

The contest is divided into three categories: buildings, districts and infrastructure. The building category welcomes all types of buildings, new and renovated, delivering intelligent and sustainable solutions. The district category applies to blocks, eco-districts, campuses, hospitals, joint development zones that deliver total or partial good environmental practices. The last platform welcomes more substantial infrastructure, such as green energies, shared gardens, mobility project, circular economy, and so on.

The Awards are split into two periods. First, candidates will compete at a national level from April to June. Then, champions from each platform will compete at the international level until November 2021. Lastly, winners are announced at a gala in Glasgow during the COP26.

Why participate?

The Green Solution Awards is the opportunity for professionals who have brought innovative solutions to the building sectors to showcase and inspire others in doing the same. The contest will bring visibility to your projects or expertise and give the recognition your contribution deserves in the fight against climate change.

Who can apply?

Are welcome to apply professionals with any building projects presenting high energy and environmental performances. Case studies must provide innovation in sustainable development and fight against climate change in the industry of sustainable construction and cities.

How?

Potential candidates apply by filling the form on the website of Construction21. The registration is completely free. Before starting the registration process, candidates should have all general technical information at hands and 5 pictures.

When?

The deadline is fast approaching. Registrations are closing on the **25th March**.
